

3-Port Seat Valves with Male Thread, PN 16

VXG41...

- Bronze CC491K (Rg5) valve body
- DN 15...DN 50
- k_{vs} 1.6...40 m³/h
- Flat sealing connections with external thread G...B to ISO 228/1
- Sets of ALG...3 screwed fittings with threaded connection available from Siemens
- Can be equipped with SQX... motoric or SKD... and SKB... electrohydraulic actuators

Use

- For use in heating, ventilating and air conditioning systems as a control valve for mixing and diverting functions.
- For open and closed circuits.

Media

Standard version for:

Cooling water Chilled water Low temperature hot water High temperature hot water Water with anti-freeze ^{1) 2)} Brine ^{1) 2)}	-25...+140 °C
--	---------------

- 1) Media below 0 °C:
ASZ6.5 stem heating element required to prevent freezing of the valve stem in the sealing gland.
- 2) Water with anti-freeze and brine:
down to -25 °C as per DIN 3158 (stress case I)

Type summary

Type reference	DN	k_{vs} [m ³ /h]	S_v
VXG41.1301 ¹⁾	15	1.6	> 50
VXG41.1401 ¹⁾		2.5	
VXG41.15		4.0	
VXG41.20	20	6.3	> 100
VXG41.25	25	10	
VXG41.32	32	16	
VXG41.40	40	25	
VXG41.50	50	40	

- ¹⁾ These types, as a standard, are equipped with a tight bypass. The other valves are available as special versions with tight bypass, type suffix 01 (e.g. VXG41.4001).

DN = Nominal size

k_{vs} = Nominal flow rate of cold water (5...30 °C) through the fully open valve (H_{100}) by a differential pressure of 100 kPa (1 bar)

S_v = Rangeability k_{vs} / k_{vr}

k_{vr} = Smallest k_v value, at which the flow characteristic tolerances can still be maintained, by a differential pressure of 100 kPa (1 bar)

Accessories

Type reference	Description
ALG...3	Set of 3 screwed fittings for 3-port valves, consisting of - 3 union nuts - 3 discs and - 3 flat seals
ASZ6.5	Electric stem heating element, AC 24 V 30 W, required for media below 0 °C

Order

When ordering please give quantity, product name and type reference.

Example: 2 valves VXG41.25
2 sets of screwed fittings ALG253

Delivery

Valves, actuators and accessories are packed and supplied separately.

Spare parts

Standard version

Replacement for EPDM-O ring sealing gland made from dezincification-free brass, including flat seal made from copper, for cooling water, chilled water, low temperature hot water, high temperature hot water, saturated steam, and brine -25...+140 °C

for VXG41... DN 15...DN 50 (stem-Ø 10 mm)

Note: Pneumatic actuators are available on request from your local office or branch.
Application is possible only if the VXG41... is used as a mixing valve.

Valve cross section

Guided perforated plug which is integrated in the valve stem.

The seat II – I is attached to the valve body with the aid of special gland material.

Sizing

Flow diagramm

- Δp_{max} = Maximum permissible differential pressure across the valve's control path, valid for the entire actuating range of the motorised valve
- Δp_{v100} = Differential pressure across the fully open valve and the valve's control path II – I by a volume flow V_{100}
- \dot{V}_{100} = Volume flow through the fully open valve (H_{100})
- 100 kPa = 1 bar \approx 10 mWS
- 1 m³/h = 0.278 l/s water at 20 °C

Valve flow characteristic

Valve flow characteristic in the

Through-port

0 ... 30 %: linear

30 ... 100 %: $n_{gl} = 3$ to VDI / VDE 2173

Bypass

0...100 %: linear

Mixing: flow from port II and port III to port I

Diverting: flow from port I to port II and port III

Port I = constant flow

Port II = variable flow

Port III = bypass (variable flow)

Use the 3-port valve primarily as a mixing valve.

Working pressure and temperature

Working pressure staged as per ISO 7268 and EN 1333

at operating temperatures of $-25...+140$ °C as per DIN 4747 and DIN 3158

Notes

Engineering

In open circuits, there is a risk of valve plug seizing caused by scale deposits. Thus, use only the most powerful actuator SKB... for these applications. Additionally, periodic actuation (twice or three times per week) must be planned.

With closed and open circuits always use a strainer upstream of the valve to increase the valve's functional safety.

For media below 0 °C, use the electric ASZ6.5 stem heating element to prevent the valve stem from freezing in the sealing gland. For safety reasons, the stem heating element has been designed for AC 24 V / 30 W operating voltage.

Mounting

Both valve and actuator can easily be assembled at the mounting location. Neither special tools nor adjustments are required.

The valve is supplied with Mounting Instructions 4 319 9563 0.

Orientation

Direction of flow

When mounting, pay attention to the valve's flow direction symbol:

- Mixing from II / III to I
- Diverting from I to II / III

Commissioning

Commission the valve only if the actuator has been mounted correctly.

Valve stem retracts: through-port II – I opens, bypass III closes
 Valve stem extends: through-port II – I closes, bypass III opens

Maintenance

VXG41... valves require no maintenance.

Warning

When doing service work on the valve / actuator:

- Deactivate the pump and turn off the power supply
- Close the shutoff valves
- Fully reduce the pressure in the piping system and allow pipes to completely cool down

If necessary, disconnect the electrical wires.

Before putting the valve into operation again, make certain the actuator is correctly fitted.

Stem sealing gland

- The glands can be exchanged without removing the valve, provided the pipes are depressurized and cooled off and the stem surface is unharmed, refer to «Order».
- If the stem is damaged in the gland range, replace the entire stem-plug-unit.

Contact your local office or branch.

Disposal

Before disposal the valve must be dismantled and separated into its various constituent materials.

Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view.

Current local legislation must be observed.

Warranty

The technical data given for these applications is valid only in conjunction with the Siemens actuators as detailed under «Equipment combinations».

All terms of the warranty will be invalidated by the use of actuators from other manufacturers.
